Subject: Animas River situation report from poison centers

OK, here is the combined sit-rep for today. I think calls may just trickle in, so if you all send me your info as you get cases, I'll create reports prn. If it snowballs, we'll get another plan. I did remove PHI as these become public documents. If your local HDs want info on a particular case they can call the poison center in the state identified.

Subject: RE: News: Contamination in Animas River continues to decrease

There is a conference call right now for the four states.

Today (Wednesday) at 3:00 (AZ time) is a conference call for PIO's from the 4 states (Colorado, NM, Utah and AZ). The call in information for the call today is also dial 877-820-7831. then 906 878#.

I'm listening in, not sure if anyone else on this email is on the line. Feel free to call in.

Thanks

Keith

Hi Susan,

Colorado calls

1. 8/8/15: 56yom staying in a cabin near river. Stored hen eggs in a bucket in the river to keep them cool. Bucket water supposedly clear. Ate the eggs on the 7th (1 day after spill) and presented to ED on 8th w/ complaints of diarrhea tinged w/ blood (also has h/o hemorrhoids). No labs/tests done.
2. 8/9/15: 3 children aged 8, 10, and 13 were taken to river to observe the spill. They played in the water and later ate dinner w/o washing hands first. Per father, they still had some water on their hands when they ate. All kids were ASX at time of call. No labs/tests recommended.

Hi guys,

We are participating in a meeting of public health and ATSDR folks in Farmington tonight. I wanted to bring them a situation report, jointly done by our four states. I wonder if each of you could email me your numbers and case summaries, which I can add to the list and I'll combine them and send it out to all of you to disseminate to your state epi people? Then I can give credit to everyone.

We are using Contaminated Water Micromedex code for these cases.

Shireen

Al, Shireen, Susan,

Are you guys using a specific substance code to track the calls?

We want to stay consistent so they are easy to track during or later.

Thanks

Keith
